Subject: Letter of request for a water refill station in the JLCC

Dear Mayor and Council,

We are writing to request your consideration for the installation of a water fountain/refillable water station at the Jasper Library and Cultural Center.

Water bottle filling stations provide a convenient, easy-to-use, and hygienic option for accessing clean, safe drinking water. These stations are beneficial for everyone, including tourists, employees, students, and pedestrians, who frequently seek them out in public buildings.

The following points highlight the benefits observed by other facility owners and municipal managers who have installed water bottle filling stations:

- Elimination of lead contamination as the water from refill stations is completely lead-free;
- Offer access to safe and clean drinking water for everyone;
- The water from the town of Jasper is usually purer and cleaner than bottled water;
- Promotion of hydration as our summers become warmer;
- Reducing the number of plastic water bottles that end up in our ocean;
- Reducing the carbon footprint by elimination the transportation of water bottles;
- Cost savings.

Given the high level of activity within and around the JLCC, it is both practical and beneficial to provide a water bottle filling station, especially as we move forward in 2024. This would reduce the reliance on bottled water and align with sustainability goals.

The photo to the right suggests a potential site for the station on the main floor of the JLCC, between the two washrooms, where plumbing access appears to be feasible.

Thank you for your consideration.

Sincerely,

Jasper Library & Cultural Centre
